The Sentinel

**Human Rights Action :: Humanitarian Response :: Health :: Education ::
Heritage Stewardship :: Sustainable Development**

Period ending 29 May 2021 :: Number 368

This weekly digest is intended to aggregate and distill key content from a broad spectrum of practice domains and organization types including key agencies/IGOs, NGOs, governments, academic and research institutions, consortiums and collaborations, foundations, and commercial organizations. We also monitor a spectrum of peer-reviewed journals and general media channels. The Sentinel's geographic scope is global/regional but selected country-level content is included. We recognize that this spectrum/scope yields an indicative and not an exhaustive product.

The Sentinel is published as a PDF, scheduled for release each weekend. The PDF is posted, and the elements of each edition are presented as a set of blog posts at <https://ge2p2-center.net/>. This blog allows full-text searching of over 6,000 entries.

Request email delivery of the pdf:

If you would like to receive the PDF of each edition via email [Constant Contact], please send your request to david.r.curry@ge2p2global.org

The Sentinel is a service of the [GE2P2 Global Foundation](#), which is solely responsible for its content. Comments and suggestions should be directed to:

*David R. Curry

Belarus – UN OHCHR

[Press briefing notes on Belarus](#)

Office of the United Nations High Commissioner for Human Rights

Spokesperson: Rupert Colville

Location: Geneva

Date: 25 May 2021

Like so many others, we are shocked by the unlawful arrest and arbitrary detention of the Belarusian journalist Roman Protasevich after the Ryanair plane on which he was travelling was forcibly diverted to the Belarus capital Minsk, apparently under false pretences and with the express purpose of capturing Mr Protasevich.

The manner, through threat of military force, in which Protasevich was abducted from the jurisdiction of another State and brought within that of Belarus was tantamount to an extraordinary rendition. Such abuse of State power against a journalist for exercising functions that are protected under international law is receiving, and deserves, the strongest condemnation.

Penalization of a journalist solely for being critical of the government can never be considered to be a necessary restriction of freedom of expression and is thus a violation of Article 19 of the International Covenant on Civil and Political Rights. Equally, under human rights law, the mere act of organizing a peaceful assembly should never be criminalized under domestic laws, including counterterrorism laws, and **the arrest or detention of someone as punishment for the legitimate exercise of their rights to freedom of opinion and expression and freedom of assembly, is considered arbitrary.**

We fear for Roman Protasevich's safety and wish to seek assurances that he is treated humanely and is not subjected to ill treatment or torture. His appearance on state TV last night was not reassuring, given the apparent bruising to his face, and the strong likelihood that his appearance was not voluntary, and his "confession" to serious crimes was forced. Information obtained under coercion cannot be used against Mr Protasevich in any legal proceedings. Such forced confessions are prohibited under the Convention against Torture.

We are also concerned about Mr Protasevich's girlfriend, Sofia Sapaga, who has also reportedly been arbitrarily arrested.

In addition to the issues relating to Mr Protasevich, the forced landing of the passenger plane in Minsk terrorized passengers on board and exposed them to unnecessary danger, in violation of their human rights.

This astonishing episode constitutes a new phase in the Belarusian authorities campaign of repression against journalists and civil society in general. This arbitrary arrest is a sign of an extremely worrying escalation in the crackdown of dissenting voices, not just of journalists but also of Belarusian human rights defenders and other civil society actors, including those living abroad.

We call for the immediate release of both Roman Protasevich, and Sofia Sapega, both of whom should be allowed to continue to their intended destination in Lithuania.

[OPT] Palestine - Israel

[Human Rights Council Establishes International Commission of Inquiry to Investigate Violations in the Occupied Palestinian Territory, including East Jerusalem, and in Israel](#)

United Nations Human Rights Council
27/05/2021

The Human Rights Council this afternoon adopted a resolution on ensuring respect for international human rights law and international humanitarian law in the Occupied Palestinian Territory, including East Jerusalem, and in Israel, in which it established an international commission of inquiry to investigate violations of international humanitarian law and all alleged violations and abuses of international human rights law leading up to and since 13 April 2021, and all underlying root causes of recurrent tensions.

The resolution was adopted at the end of a one-day special session of the Human Rights Council on the "grave human rights situation in the Occupied Palestinian Territory, including East Jerusalem".

In the resolution ([A/HRC/S-30/L.1](#)), adopted by a vote of 24 in favour, 9 against and 14 abstentions, **the Council decides to urgently establish an ongoing independent, international commission of inquiry, to be appointed by the President of the Human Rights Council, to investigate in the Occupied Palestinian Territory, including East Jerusalem, and in Israel all alleged violations of international humanitarian law and all alleged violations and abuses of international human rights law** leading up to and since 13 April 2021, and all underlying root causes of recurrent tensions, instability and protraction of conflict, including systematic discrimination and repression based on national, ethnic, racial or religious identity.

The Council also calls upon all relevant parties to cooperate fully with the commission of inquiry and to facilitate its access. It urges all States to refrain from transferring arms when they assess, in accordance with applicable national procedures and international obligations and standards, that there is a clear risk that such arms might be used in the commission or facilitation of serious violations or abuses of international human rights law or serious violations of international humanitarian law.

Pakistan introduced the draft resolution on behalf of the Organization of Islamic Conference. Israel and the State of Palestine spoke as a concerned countries.

Speaking in general statements or in statements before or after the vote were Austria, Germany, Russian Federation, United Kingdom, Bahamas, Mexico, Venezuela, France, Bulgaria and the Netherlands

...Speakers said people in Israel, Gaza and the West Bank needed their leaders to make courageous steps towards peace. Some speakers said that the indiscriminate barrage of rockets fired by Hamas and Palestinian Islamic Jihad into Israel were completely unacceptable. Other speakers said the Council must do three things: address the root causes of the conflict; call the situation what it was, apartheid and persecution, that is crimes against humanity; and end impunity by creating a standing mechanism – because the problems were systemic, long-lasting and would not be solved overnight. It was unconscionable that States including the United States, Germany and Italy still supplied weapons and other military assistance to the Israeli Government, despite the clear risk of serious violations of international human rights law and international humanitarian law. Some speakers, expressing their full solidarity with Israel, said they refused to support any investigation or mechanism that victimised and exonerated Hamas and other violent organizations. There had been an explosion of anti-Semitism in past weeks, the result of the anti-Semitic vilification of Israel, to which the Council provided cover. Speaking were Faysal Mekadad, Minister for Foreign Affairs and Expatriates of Syria; Sultan bin Saad Al-muraikhi, Minister for Foreign Affairs of Qatar; Sameh Shoukry, Minister for Foreign Affairs of Egypt; and Dato' Kamarudin Jaffar, Deputy Foreign Minister of Malaysia.

The following countries also took the floor: Argentina, France, Senegal, Nepal, Bulgaria, Argentina, Netherlands, Philippines, Ukraine, Uzbekistan, Jordan, Costa Rica, Djibouti, Mali, Brunei Darussalam, Ireland, Lebanon, Saudi Arabia, Ecuador, Iraq, Chile, Democratic People's Republic of Korea, Malta, Viet Nam, Morocco, Australia, Nigeria, Niger, Algeria, Maldives, Albania, Sovereign Order of Malta, South Africa, United Nations Relief and Works Agency, Peru, Timor-Leste, Oman, Liechtenstein, Yemen, Canada, Holy See, Iran, Colombia, Botswana, New Zealand, Luxembourg, Guyana, United Arab Emirates, Hungary, Sri Lanka, Paraguay, Switzerland and Angola.

The following non-governmental organizations also took the floor: International Commission of Jurists; European Union of Jewish Students; Human Rights Watch; Al-Haq, Law in the Service of Man; Defence for Children International; International Service for Human Rights; Norwegian Refugee Council; Women's International League for Peace and Freedom; Institute for NGO Research; Ingenieurs du Monde, United Nations Watch; World Jewish Congress; Amnesty International; Caro Institute for Human Rights Studies; ADALAH, Legal Centre for Arab Minority Rights in Israel; International Association of Jewish Lawyers and Jurists; and Women's Centre for Legal Aid and Counselling.

Israel spoke in a point of order.

This was the thirtieth special session of the Human Rights Council, which was requested by 69 States, of whom 21 are Member States of the Council and 48 are Observer States...

"Nature-based Solutions [NbS] – Financing

State of Finance for Nature – *Tripling investments in nature-based solutions by 2030*

Report – UNITED NATIONS ENVIRONMENT PROGRAMME; WORLD ECONOMIC FORUM; ECONOMICS OF LAND DEGRADATION INITIATIVE; VIVID ECONOMICS

27 May 2021 :: 65 pages ISBN: 978-92-807-3865-0

PDF: <https://wedocs.unep.org/xmlui/bitstream/handle/20.500.11822/36145/SFN.pdf>

Executive Summary [excerpts]

:: Nature loss is at the heart of many societal challenges, while nature-based solutions hold the potential to address interlinked crises: The pace of species extinction, global warming, the growing number of extreme weather events and zoonotic diseases like Covid-19, have further reinforced the need to invest in sustainable action that enhances the resilience of ecosystems and addresses societal challenges, such as food security, climate change, water security, human health and enhanced resilience to disaster risk.

:: Our livelihoods depend on nature. Our collective failure to date to understand that nature underpins our global economic system, will increasingly lead to financial losses. More than half of the world's total GDP is moderately or highly dependent on nature. Agriculture, food and beverages and construction are the largest sectors that are dependent on nature and these generate USD 8 trillion in gross value added.

:: The integrity of the Earth's ecosystems has been significantly compromised as a result of human activity and the paradigm that has prioritised short-term economic growth. In order to ensure that humanity does not breach the safety limits of the planetary boundaries, we need a fundamental shift in mindset, transforming our relationship with nature. Currently, the majority of the essential benefits of nature have no financial market value, despite underpinning our current and future prosperity. From government policies related to procurement, taxation, trade and regulation, to the way businesses and financial institutions make decisions on investment, risk and disclosure, it is vital that we hardwire into our economic system the value of nature in a profound way.

:: Knowledge on capital expended and needed for NbS remains limited...

:: The report finds that approximately USD 133 billion/year currently flows into NbS (using 2020 as base year), with public funds making up 86 per cent and private finance 14 per cent...

:: Looking to the future, investment in **NbS ought to at least triple in real terms by 2030** and increase four-fold by 2050 if the world is to meet its climate change, biodiversity and land degradation targets...

:: The compilation of data on capital investment in nature across all sectors and for all major economies has proven challenging and the estimates are highly uncertain...

:: The public sector plays a fundamental role in creating opportunities and demand for investment in NbS...

:: NbS poses an opportunity for private sector investment in pursuit of sources of revenue, to reap the benefits of increased resilience, to reduce costs and to enhance reputation and purpose..

Main Report [excerpt]

1.2 Definition of NBS [p.12]

This report uses the global standard developed by the International Union for the Conservation of Nature (IUCN) for nature-based solutions. **NbS are defined as "Actions to protect, sustainably manage, and restore natural or modified ecosystems, that address societal challenges effectively and adaptively, simultaneously providing human wellbeing and biodiversity benefits"**. The goal of nature-based solutions is "to support the achievement of society's development goals and safeguard human well-being in ways that reflect cultural and societal values and enhance the resilience of ecosystems, their capacity for renewal and the provision of services; nature-based solutions are designed to address major societal challenges, such as food

security, climate change, water security, human health, disaster risk, social and economic development”.

The following preliminary principles are to be considered with the NbS definition:

- i. NbS embrace nature conservation norms (and principles);
- ii. NbS can be implemented alone or in an integrated manner with other solutions to societal challenges (such as technological and engineering solutions);
- iii. NbS are determined by site-specific natural and cultural contexts that include traditional, local and scientific knowledge;
- iv. NbS produce societal benefits in a fair and equitable way in a manner that promotes transparency and broad participation;
- v. NbS maintain biological and cultural diversity and the ability of ecosystems to evolve over time;
- vi. NbS are applied at a landscape scale;
- vii. NbS recognize and address the trade-offs between the production of a few immediate economic benefits for development and future options for the production of the full range of ecosystem services; and
- viii. NbS are an integral part of the overall design of policies, and measures or actions, to address a specific challenge.
- ix. NbS emphasize solutions. Such solutions address the multifaceted environmental crises and broader societal challenges affecting humanity today, including climate change, biodiversity loss, land degradation, human health, migration, natural hazards and human-induced disaster, food and water security and biochemical imbalances.

COVID – Seventy-fourth World Health Assembly #WHA74

24 May to 1 June 2021

Theme: Ending this pandemic, preventing the next: building together a healthier, safer and fairer world.

Documentation [here](#)

.....

[Double COVID-19 Vaccine Production, Bolster Primary Health-Care Systems to Prepare for Next Global Emergency, Secretary-General Tells World Health Assembly](#)

24 May 2021 SG/SM/20740

[Excerpt focused on COVID vaccines/vaccination]

...We are at war with a virus. We need the logic and urgency of a war economy, to boost the capacity of our weapons. On Friday, I called on the [Group of 20] (G20) **to set up a task force that brings together all countries with vaccine production capacities, the World Health Organization, the ACT-Accelerator partners and international financial institutions, able to deal with the pharmaceutical companies and other key stakeholders.**

It should aim to at least double manufacturing capacity by exploring all options, from voluntary licenses and technology transfers to patent pooling and flexibility on intellectual property rights. The task force should address equitable global distribution by using the ACT-Accelerator and its COVAX Facility. The G20 task force should be co-convened at the highest levels by the major Powers who hold most of the global supply and production capacity, together with the multilateral system. I am ready to mobilize the entire United Nations system to support this effort...

.....

[Director-General's opening remarks at the World Health Assembly](#)

24 May 2021

[excerpt focused on COVID vaccines/vaccination]

...The ongoing vaccine crisis is a scandalous inequity that is perpetuating the pandemic. More than 75% of all vaccines have been administered in just 10 countries. There is no diplomatic way to say it: a small group of countries that make and buy the majority of the world's vaccines control the fate of the rest of the world.

The number of doses administered globally so far would have been enough to cover all health workers and older people, if they had been distributed equitably. We could have been in a much better situation.

I understand that every government has a duty to protect its own people. I understand that every government wants to vaccinate its entire population. That's what we want too. And in time, there will be enough supply for everyone, including those at lower risk.

But right now, there is not enough supply. **Countries that vaccinate children and other low-risk groups now do so at the expense of health workers and high-risk groups in other countries. That's the reality.**

At the Executive Board meeting in January, I issued a challenge to see vaccination of health workers and older people underway in all countries within the first 100 days of the year. That target was very nearly achieved. But the number of doses available to COVAX remains vastly inadequate.

COVAX works. We have shipped every single one of the 72 million doses we have been able to get our hands on so far to 125 countries and economies. But those doses are sufficient for barely 1 percent of the combined population of those countries.

So today I am calling on Member States to support a massive push to vaccinate at least 10 percent of the population of every country by September, and a "drive to December" to achieve our goal of vaccinating at least 30 percent by the end of the year. This is crucial to stop severe disease and death, keep our health workers safe and reopen our societies and economies....

.....

.....

[COVAX Joint Statement: Call to action to equip COVAX to deliver 2 billion doses in 2021](#)

Joint statement by:

:: Dr Richard Hatchett, CEO, Coalition for Epidemic Preparedness Innovations (CEPI),

:: Dr Seth Berkley Chief Executive Officer, Gavi, the Vaccine Alliance (Gavi),

:: Dr Tedros Adhanom Ghebreyesus Director-General, World Health Organization (WHO) and

:: Henrietta Fore, Executive Director, UNICEF

... the terrible surge of the virus in India has had a severe impact on COVAX's supply in the second quarter of this year, to the point where, by the end of June we will face a shortfall of 190 million doses.

"Even though COVAX will have larger volumes available later in the year through the deals it has already secured with several manufacturers, **if we do not address the current, urgent shortfall the consequences could be catastrophic.** "But we can meet this challenge with concerted action and global leadership..."

...**"If the world's leaders rally together, the original COVAX objectives – delivery of 2 billion doses of vaccines worldwide in 2021, and 1.8 billion doses to 92 lower-income economies by early 2022 are still well within reach...**

.....

No-one is safe until everyone is safe – why we need a global response to COVID-19

Joint Statement – Signatories below

GENEVA, 23 May 2021 – *[Editor's text bolding]*

"Equitable vaccine distribution is a humanitarian imperative..."

..We advocate here for 'Health for All', where each person's life is valued, and every person's right to healthcare is upheld. People not only need vaccinations – they need access to healthcare workers who are skilled and equipped to deliver adequate medical support.

"We need to build a world where each community, regardless of where they live, or who they are, has urgent access to vaccinations: not just for COVID-19, but also for the many other diseases that continue to harm and kill. As the pandemic has shown us, in our interdependent world no one is safe until everyone is safe.

"We have a choice: vaccine nationalism or human solidarity...We therefore call on world leaders to:

1. Ensure equitable access to vaccines between countries by providing vaccines, sharing knowledge and expertise, and fully funding the Access to COVID-19 Tools (ACT) Accelerator, which is working to provide equitable access to and implementation of COVID-19 diagnostics, therapeutics, and vaccines.

2. Ensure equitable access to vaccines within countries by ensuring all sectors of the population are included in national distribution and vaccination programs, regardless of who they are or where they live, including stigmatized and marginalized communities for whom access to healthcare might not be straightforward.

3. Support countries financially, politically and technically to ensure that curbing COVID-19 is not a standalone goal, and instead is one important element of a broader health strategy, implemented alongside communities to bring longer-term improvements to people's health and access to healthcare. We are committed, in our different institutions, to offering all the help we can to support actions by communities and authorities.

"It is time for decisive leadership. Countries and organizations across the world have a once-in-a-generation opportunity to address global inequality and reverse some of the fallout from the past year. In doing so, they will bring hope not only for the poorest in the world, but for us all."

Coronavirus [COVID-19] - WHO

Public Health Emergency of International Concern (PHEIC)

<https://www.who.int/emergencies/diseases/novel-coronavirus-2019>

Weekly Epidemiological and Operational updates

Last update: 29 May 2021

Confirmed cases :: 169 118 995 [week ago: 165 772 430]

Confirmed deaths :: 3 519 175 [week ago: 3 437 545]

Vaccine doses administered: 1 546 316 352 [week ago: 1 448 242 899]

.....

[Weekly operational update on COVID-19 - 24 May 2021](#)

In this edition of the COVID-19 Weekly Operational Update, highlights of country-level actions and WHO support to countries include:

- :: Medical supplies reach Indian states and Union Territories
- :: Egypt and Philippines receive additional shipments of COVID-19 vaccines through the COVAX Facility
- :: Strengthening quality assurance and biosafety for SARS-CoV-2 sample collection sites in Azerbaijan
- COVID-19 posing unprecedented threat on war-torn Yemen
- :: Online training on vaccination to frontline workers in Uruguay
- :: WHO EPI-WIN hosted discussion for youth networks on mental health and how ten years of
- :: Pandemic Influenza Preparedness (PIP) strengthened capacities to support the COVID-19 response
- :: Regular updates on WHO's resource requirements and funds received to support countries in implementing the COVID-19 Strategic Preparedness and Response Plan 2021, WHO/PAHO procurement of critical supplies, and implementation of the Unity Studies

[Weekly epidemiological update on COVID-19 - 25 May 2021](#)

Overview

For the second successive week, the number of COVID-19 cases globally remains at the highest levels since the beginning of the pandemic with over 5.7 million new weekly cases, following nine consecutive weeks of increases. New deaths continue to increase for the seventh consecutive week, with over 93 000 deaths. The South-East Asia Region continues to report marked increases in both case and death incidences.

In this edition, special focus updates are provided on:

:: World Hand Hygiene Day, 5 May 2021

:: WHO partnership with SeroTracker — synthesizing “real-time” seroprevalence data to support global pandemic response

:: SARS-CoV-2 variants

Our World in Data

Coronavirus (COVID-19) Vaccinations

Daily COVID-19 vaccine doses administered per 100 people, May 28, 2021

Shown is the rolling 7-day average per 100 people in the total population. This is counted as a single dose, and may not equal the total number of people vaccinated, depending on the specific dose regime (e.g. people receive multiple doses).

Emergencies

POLIO

Public Health Emergency of International Concern (PHEIC)

Polio this week as of 26 May 2021

:: Come and join the virtual launch of the Polio Eradication Strategy 2022-2026, at an online event on Thursday 10 June 2021 (at 2pm, Central European Summer Time). More information, including registration details, are available [here](#), where you will find the 'Save the Date'.

:: Understanding gender-related barriers to immunization is essential to achieve polio eradication. But what is gender? What is the difference between gender and sex? How do sex and gender influence health, including immunization? [This newly released Q&A](#) examines the links between gender and health, highlighting WHO's ongoing work to address gender-related barriers to healthcare, advance gender equality and the empowerment of women and girls in all their diversity, and achieve health for all.

Summary of new WPV and cVDPV viruses this week (AFP cases and ES positives):

:: Pakistan: one cVDPV2 positive environmental sample

:: Burkina Faso: one cVDPV2 case
:: Congo: one cVDPV2 case
:: DR Congo: five cVDPV2 cases
:: Guinea: one cVDPV2 case
:: Liberia: two cVDPV2 positive environmental samples
:: Madagascar: three cVDPV1 cases and one cVDPV1 positive environmental sample
:: Mali: one cVDPV2 case
:: Tajikistan: two cVDPV2 positive environmental samples

UN OCHA – Current Emergencies

Current Corporate Emergencies

Ethiopia

Ethiopia - Tigray Region Humanitarian Update Situation Report, 20 May 2021

HIGHLIGHTS

:: Humanitarian needs continue to be grave, exceeding to current capacities.
:: While some areas were accessible, others remain hard to reach due to movement restrictions and ongoing conflict.
:: An alarming number of cases of acute malnutrition among children has been reported.
:: Only about 2 per cent of the targeted 720,000 school children have access to learning opportunities.
:: About US\$200 million is needed to respond to humanitarian needs until the end of July.

OAS Mission in Peru Condemns Despicable Terrorist Attack that Claimed the Lives of Men and Women in VRAEM

May 24, 2021

The Electoral Observation Mission of the Organization of American States (OAS) in Peru condemns the cowardly terrorist attack that killed 14 people on the night of May 23, and categorically rejects any type of intimidation against citizens.

Violence has no place in democracy. The Mission hopes that the authorities move swiftly in the investigation of this atrocious act and bring those responsible to justice.

Likewise, the Mission exhorts the political organizations in contention to carry out campaigns in which the exchange of respectful ideas and a constructive attitude in favor of Peru prevail. In addition, it expresses its concern about the attacks and threats against the National Elections Jury (JNE) and the National Office of Electoral Processes (ONPE), which seek to undermine confidence in the ongoing process and undermine its autonomy...

Breaking the Taboo: Managing Menstrual Hygiene at School

May 30, 2021

by [Mahjabeen Ahmed](#) and [Md Zillur Rahman](#)

Every year on 28 May, nonprofit organisations, government agencies and the private sector come together to celebrate Menstrual Hygiene Day, and advocate for the importance of menstrual hygiene. This year's theme is action and investment in menstrual hygiene and health. Since the inception of BRAC's water and sanitation programme in 2006, it has taken a holistic approach in addressing

menstrual health, working closely with the government and other stakeholders to improve the situation.

An update on our funding
26.05.2021

One of Elrha's donors, the UK Foreign Commonwealth and Development Office (FCDO), has reduced its UK Aid budget for 2021/22. This follows its decision to reduce the foreign aid budget from 0.7% to 0.5% of total national income.

As a direct result, its contribution to our Humanitarian Innovation Fund (HIF) has been reduced by approximately 65%, and the funding for our Research for Health in Humanitarian Crises (R2HC) programme has also been reduced for this period.

We have been working closely with our Board of Trustees to map out how we can continue to support our existing work and commitments as much as possible, while also aligning with our donor priorities. We believe it is highly likely we can continue to fund existing contracted grants without any cuts, but we are awaiting full agreement of this from our donors.

Unfortunately, the significant level of cuts means it will not be possible for us to fund some of the innovation projects recently selected for funding through the HIF but not yet contracted. We know this outcome will have major implications for projects, the teams involved and, of course, the communities they focus on and support.

Due to the funding reduction for our R2HC programme, a special funding call planned for research with the potential to create transformative change to health response within the humanitarian sector, will no longer go ahead.

However, we anticipate we will be able to proceed with our annual funding call later this year, and importantly, continue to fund our existing portfolio of research grants...

Weekly humanitarian blog posts selection

Everyday politics of humanitarian action
17th – 23rd May

This week's selection opens with a post on the newly agreed Charter the Climate and Environment Charter for Humanitarian Organizations. It also has several posts about everyday politics of humanitarian action: the mishap in budget cuts in the UK, the nuts and bolts of advocacy in fragile contexts, the tacky aspects of evaluations, deeper analysis of COVID-19 statistics, digital protection, and the contradictions between decentralizing INGOs through country offices and decolonisation of aid.

Three blogs on the Israeli-Palestine conflict, chosen from among dozens of blogs that appeared this week, address how a response can be balanced yet acknowledge the very uneven level of aggression, implicitly challenging the humanitarian notion of neutrality.

:: Journal Watch

The Sentinel will track key peer-reviewed journals which address a broad range of interests in human rights, humanitarian response, health and development. It is not intended to be exhaustive. We will add to those monitored below as we encounter relevant content and upon recommendation from readers. We selectively provide full text of abstracts and other content but note that successful access to some of the articles and other content may require subscription or other access arrangement unique to the publisher. Please suggest additional journals you feel warrant coverage.

Ending the HIV Epidemic

A human immunodeficiency virus (HIV) epidemic began in the United States in the 1970s. "Ending the HIV Epidemic: A Plan for America" was launched in October 2019 by the US Department of Health and Human Services, with the goal of stopping the spread of HIV by 2030. Accomplishing this goal demands not only expanding existing programs, but recognizing and responding to clinically, ethically, socially, and culturally relevant features of contemporary patients' experiences of stigma, oppression,

and living with HIV. This issue considers ethical and clinical complexities patients and clinicians encounter in HIV care today.

[Why having a voice is important to children who are involved in family support services](#)

Lisa Stafford, Jo-anne Harkin, Annie Rolfe, Judith Burton, Christine Morley

Article 104987

Having a voice in family matters is considered a protective factor from harm, and key to promoting children's wellbeing. However, since the adoption of the United Nations Convention on the Rights of the Child (1989) and specifically Article 12 pertaining to children's participation, research reveals that children's voices often remain invisible in child protection and family welfare services.

Ethics & International Affairs

Spring 2021 (35.1) | May 2021

<https://www.ethicsandinternationalaffairs.org/2021/spring-2021-35-1/>

The editors of Ethics & International Affairs are pleased to present the Spring 2021 issue of the journal! The highlight of this issue is a roundtable organized by Madison Powers on ethics and the future of the global food system. The roundtable contains contributions from Paul B. Thompson; Yashar Saghai; Anne Barnhill and Jessica Fanzo; Mark Budolfson; and Madison Powers. Additionally, the issue includes a feature article by Christopher Kutz on resource sovereignty. It also contains an essay by Yuna Han, Katharine M. Millar, and Martin J. Bayly on COVID-19 as a mass death event and an essay by Sea Young Kim and Leif-Eric Easley on women's rights in North Korea. The issue also includes a review essay by Adam Henschke on states and political violence and book reviews by Mark Berlin, Helder De Schutter, and Paul Saurette.

[Demonstrating trustworthiness when collecting and sharing genomic data: public views across 22 countries](#)

Public trust is central to the collection of genomic and health data and the sustainability of genomic research. To merit trust, those involved in collecting and sharing data need to demonstrate they are trustworthy. However, it is unclear what measures are most likely to demonstrate this.

We analyse the 'Your DNA, Your Say' online survey of public perspectives on genomic data sharing including responses from 36,268 individuals across 22 low-, middle- and high-income countries, gathered in 15 languages. We examine how participants perceived the relative value of measures to demonstrate the trustworthiness of those using donated DNA and/or medical information. We examine between-country variation and present a consolidated ranking of measures.

[European Union: Commission Publishes Proposal to Regulate Artificial Intelligence](#)

(May 26, 2021) On April 21, 2021, the European Commission published a legislative proposal for an Artificial Intelligence Act (AI Act). The AI Act addresses the risks of AI systems to the safety or fundamental rights of citizens by following an approach based on risks ranging from unacceptable to minimal. Whereas certain harmful AI-enabled practices would be completely prohibited, high-risk AI systems would be subject to mandatory requirements. Providers of certain AI systems posing a low risk would be subject to transparency rules or could voluntarily comply with the rules for high-risk AI systems. The AI Act is complemented by a proposal for a Regulation on Machinery Products, which is meant to ensure the safe integration of the AI system into the overall machinery...

[Localisation and local humanitarian action](#)

by HPN October 2020

The theme of this edition of *Humanitarian Exchange* is localisation+ and local humanitarian action. Five years ago this week, donors, United Nations (UN) agencies, non-governmental organisations (NGOs), the International Committee of the Red Cross (ICRC) and International Federation of Red Cross and Red Crescent Societies (IFRC) committed within the Grand Bargain to increase multi-year investments in the institutional capacities of local and national responders, and to provide at least 25% of humanitarian funding to them as directly as possible. Since then, there is increasing consensus at policy and normative level, underscored by the Covid-19 pandemic, that local leadership should be supported. Localisation has gone from a fringe conversation among policy-makers and aid agencies in

2016 to a formal priority under the Grand Bargain. Wider global movements on anti-racism and decolonisation have also brought new momentum to critical reflections on where power, knowledge and capacity reside in the humanitarian system. Yet progress has been slow and major gaps remain between the rhetoric around humanitarian partnerships, funding and coordination and practices on the ground.

[Overview of the Issue](#)

Kevin B. Johnson, Tiffani J. Bright, Cheryl R. Clark

...The importance of techquity—defined as the strategic development and deployment of technology in health care and health to advance health equity—was even more apparent after the events of 2020. COVID-19 upended access to care and illuminated the impact of structural racism as a cause for a widening gap of access during the pandemic. Black Lives Matter became more than a trending hashtag on Twitter, or a movement resulting in peaceful protests and calls for policy reform: it put additional focus on the issue of race as a social and not a biological construct and called into question the rationale for common practices in health care that were triggered by race. A notable example was the emerging realization that kidney function assessment was tied to race and hardwired into many of our electronic health records. The real-world evidence around our lack of techquity was incontrovertible.

This Supplemental Issue of JHCPU provides articles that describe challenges to techquity, frameworks to improve the role of technology in care, and examples of how technology can transform health, public health, and health care...

Perspective

[The “Legal Epidemiology” of Pandemic Control](#)

Scott Burris, J.D., Evan D. Anderson, J.D., Ph.D., and Alexander C. Wagenaar, M.S.W., Ph.D.

The centrality of law as a public health intervention has been undeniable during the Covid-19 pandemic. In just the first half of 2020, more than 1000 laws and orders were issued by federal, state, and local authorities in the United States in an effort to reduce disease transmission. Legal interventions include stay-at-home orders, mask mandates, and travel restrictions, as well as more particular rules for business operations, alcohol sales, curfews, and health care. Given their heavy use, importance, and obvious socioeconomic side effects, and the social and behavioral complexities of their implementation, one might have expected the National Institutes of Health (NIH), other research funders, and the research community to jump to the work of determining the right mix, intensity, and enforcement approaches of legal restrictions to control transmission with the least and most equitably distributed harms. No organized research program emerged...

Perspective

[A Hidden Opportunity — Medicaid’s Role in Supporting Equitable Access to Clinical Trials](#)

Samuel U. Takvorian, M.D., M.S.H.P., Carmen E. Guerra, M.D., M.S.C.E., and William L. Schpero, Ph.D.

Hidden deep within the \$2.3 trillion omnibus spending and relief package passed by Congress in December 2020 lies a little-known but powerful provision intended to promote equitable access to clinical trials. Beginning in January 2022, coverage of the “routine costs” associated with clinical trial participation will be guaranteed for all Medicaid beneficiaries for the first time in the program’s history. The absence of federal policy in this area until now has most likely suppressed the representation of low-income and minority populations in the clinical research that underlies therapeutic advances, thereby limiting equitable access to potentially state-of-the-art therapies and compromising the generalizability of research findings...

[The persistence of ancient settlements and urban sustainability](#)

Michael E. Smith, José Lobo, Matthew A. Peeples, Abigail M. York, Benjamin W. Stanley, Katherine A. Crawford, Nicolas Gauthier, and Angela C. Huster

PNAS May 18, 2021 118 (20) e2018155118; <https://doi.org/10.1073/pnas.2018155118>

Abstract

We propose a dedicated research effort on the determinants of settlement persistence in the ancient world, with the potential to significantly advance the scientific understanding of urban sustainability today. Settlements (cities, towns, villages) are locations with two key attributes: They frame human interactions and activities in space, and they are where people dwell or live. Sustainability, in this case, focuses on the capacity of structures and functions of a settlement system (geography, demography, institutions) to provide for continuity of safe habitation. The 7,000-y-old experience of urbanism, as revealed by archaeology and history, includes many instances of settlements and settlement systems enduring, adapting to, or generating environmental, institutional, and technological changes. The field of urban sustainability lacks a firm scientific foundation for understanding the long durée, relying instead on narratives of collapse informed by limited case studies. We argue for the development of a new interdisciplinary research effort to establish scientific understanding of settlement and settlement system persistence. Such an effort would build upon the many fields that study human settlements to develop new theories and databases from the extensive documentation of ancient and premodern urban systems. A scientific foundation will generate novel insights to advance the field of urban sustainability.

Current Issue

[People Protecting World Heritage](#)

The World Heritage Convention was created in 1972 – nearly half a century ago – as a legal instrument to protect our most outstanding cultural and natural sites around the world. It has been adopted since by 194 countries, nearing universality. Concretely, the World Heritage Convention is implemented in myriad ways, big and small, by people around the world.

In this issue, we introduce you to numerous individuals who dedicate their careers – even their lives – to taking care of these precious and fragile sites. This includes site managers on the ground, young people who run projects for hands-on heritage conservation or awareness raising to save sites, and civil society activists who protect sites, and the people who live near them, in difficult conditions..
